THE REDCLIFF REVIEW

THURSDAY, NOV. 23rd 1933

Number 4

Directing Plays Now By Radio Route

Will be Done By Mrs. Haynes
On Sunday Evenings

The Press Bulletin issued by the Department of Extension of the University of Alberta says: Groups of drama enthusiasts all over the province are saying "Let's do a play!" Many of these groups are receiving assistance from Mrs. Haynes, but it is impossible for one person to cover all the ground. So an experiment will be tried this season of directing a play by radio. A one-act play of general interest will be chosen, and Mrs. Haynes will direct this for one half hour on Friday evenings, commencing December 15th. There will be a group of players in the studio and the director will deal with the play point by point as she would on the stage. Get your group together and try this experiment. Write to the Extension Department for further details and a copy of the play.

Maie West Says Public Demands Plain Facts

Calling attention to an amazing swing about in the moral viewpoint of the cinema, Maie West, the screen's newest sensation, whose second starring picture for Paramount, "I'm No Angel," will open a fortnight later at the Monarch Theatre Monday, believes that the American people have reached that time in their consideration of life and love when they want to hear a speedy called a spade.

And the sensational success of her last film, "She Done Him Wrong," as an argument in proof of her belief.

Miss West asserts, however, that the public is uninterested in sex, crudely presented. It wants laughs, comedy and wit along with it, she theorizes, and that's what she aims to give 'em in her pictures and plays.

May exemplify her theories in "I'm No Angel," an original story. In it, she portrays a circus lion tamer, hardboiled, ambitious, captivator of man after man. But when the film ends she has one man for keeps, a millionaire bachelor, "tall, dark and handsome" Cary Grant. This picture was directed by Wesley Ruggles.

In her exposition of the constant sinner with a pearl necklace, whose love making harvests diamonds, man-line adulation, triumph and glory, Miss West has created a revolutionary screen type.

The screen has boasted many "bad women" from the days of Theda Bara. But they sinned in a heavy, sultry manner, and they always paid! But Maie West always sets her man.

In one of the bridge games in connection with the Little Theatre tournament a peculiar coincidence happened at Mr. and Mrs. Manary's home last Monday. Two tables were playing and at the end of the first four hands both tables had exactly the same score. The winning couple had 749 and the losers 90.

Farmers Show Interest In Bacon Meetings

Stress Being Laid on Quality
Not Quantity

Farmers in general are showing a keen interest in the meetings now being held throughout Alberta to promote the better bacon hog campaign inaugurated by the provincial department of agriculture in co-operation with the federal department of the railways and the packers. The gatherings are being largely attended, and the demand for information as to the importance of a strong desire on the part of the farmers to do their part in raising the percentage of select bacon type hogs produced in Alberta. Stress is being laid on the point that it is not increase in numbers that is needed, but a greater proportion of high quality hogs such as are suitable for the British market.

ALBERTA POULTRY FOR THE BRITISH MARKET

A considerable quantity of Alberta poultry will be exported to the British market this fall, it is reported by the provincial poultry department. Supplies are now being gathered together for a shipment during the week of November 24th, which it is hoped will amount to about eight carloads. The poultry is being obtained largely from southern Alberta points, and it is interesting to note, will include a whole car of geese. Last year about one million pounds of Canadian poultry were exported to the British market a quantity of which went from Alberta.

Mr. Bert Wyatt, who has been employed in the Pottery plant here, left last week for Hamilton, Ont., where he has secured a position with a new Pottery firm in that city.

Hector Lang Again Chosen as Candidate

At Liberal Convention Held in
Medicine Hat

At the Liberal Convention for Medicine Hat Provincial constituency held in Medicine Hat last Thursday evening Hector Lang the present member, was unanimously chosen as the candidate for the next general election. The Medicine Hat constituency comprises Medicine Hat, Redcliff and Dunmore. Officers for the constituency were also elected at this meeting as follows:

President — Dr. J. S. McLeod
1st Vice Pres. — W. Campeau, Redcliff.
2nd Vice Pres. — W. R. Nichols, Dunmore;
3rd Vice Pres. — Alex Macgregor, Medicine Hat.
Sec. Treas. — Dr. L. Wyatt

Members of the executive from Redcliff are: B. C. Hargrave, E. N. Ross, R. S. Hodges, A. Osgood and W. Hill.

Representatives from the Liberal Associations from Empress and Cyrenus constituencies were also present and elected officers for the year but did not choose candidates. This will be done in their respective constituencies later.

What grumbling was done on the town streets last summer certainly made a big improvement in traffic conditions after the recent snow and rain storms.

This week the Review is in receipt of a communication in criticism of our editorial in last week's issue headed "The Bunk," but we are unable to publish it as the writer had not the courage to sign his name. We regret this, as the letter would show ratepayers the caliber of some of the people who are responsible for our ever increasing taxes.

MR. HECTOR LANG

Mr. G. Schneider, of the Harvest Vale district, is moving this week to Tilley where he will open a garage and blacksmith shop.

Owing to the outbreak of whooping cough in town there will be no clinic held until further notice.

A Macquarie Concert by the Junior W. A. of St. Ambrose church will be held in the parish hall on Friday evening, Dec. 8th beginning at 7:30. 12 prizes, 6 for boys and 6 for girls, will be given for fancy and comic costumes. Admission 15c children 10 cents.

There will be no lack of candidates for the deferred election in Victoria and Vancouver, which takes place next Monday. For the two Vancouver seats there are twelve candidates and for the four Victoria seats there are 23 candidates.

The Drumbeller Mail to hand this week announces the marriage of Elmer Lawrence Keats, formerly of Redcliff and son of Mr. and Mrs. Wm. Keats, to Miss Evelyn Beatrice Morrison. They were married in Calgary by Rev. Geo. A. Dickson, on November 10th.

1000 UNEMPLOYED GOING TO CAMP

Three thousand Alberta's single unemployed men will be in camps before the end of this week, relief commission officials stated Sunday night.

There will then remain an additional 4,000 not in camps but under the jurisdiction of the commission. Not all of these are in kitchens because physically unfit are being cared for elsewhere.

Preparations were made during the week end to send an advance guard of 60 men Monday to Morley where a new camp will be opened and 30 will also leave for Camp no. 1 near Cochrane.

Of 50 men moving for report to the labor bureau for camp, Saturday, 12 "deserted" en route to the bureau and were immediately struck off relief officials said.

Mrs. Harry Elder and son of Moosejaw are at present visiting Mrs. Elder's grandparents, Mr. and Mrs. P. Lawrie.

One of the heaviest rains of the season struck this district early last Monday morning. It was accompanied by a high wind which did some damage to fences, trees etc. The roads were in bad condition for a few days as a result.

Redcliff Reminiscences

Taken From Our File of
November 27 1914

Mr. Vollef, manager of the motor truck factory here, has just returned from a visit to his home in Minneapolis.

The British Battleship, Bulwark, was completely destroyed when a terrible explosion occurred. Of the crew of 700 men only 14 survived. The cause of the explosion is a mystery.

The upper story of the Northern Hotel was completely gutted by fire last night. This is the second fire in this building in three months.

Councillor McLehlan and Engineer Askwith have been appointed a committee to look into establishing a market in Redcliff.

The auditor, H. E. Howard, says the town is in a very satisfactory financial condition. The revenue for the current period shows a surplus of over \$48,000. There are \$11,000 of taxes unpaid. Of this amount \$83,000 is this year's taxes.

Mr. Young, manager of the shoe factory, is at present on a business trip to Eastern centres.

The home of Mr. and Mrs. Purkiss of Lockwood was burned to the ground last evening.

Oxford Group Mass Meeting Next Sunday

Will be held in Gordon Memorial
at 3 o'clock p. m.

The local Oxford Group will hold a mass meeting in Gordon Memorial church school room this coming Sunday, Nov. 26th at 3 p. m. New members will be given an opportunity to speak and the Groupers will tell of the change that has come into their lives since their attempt to put the fundamental principles of Christianity into actual practice. A cordial invitation to attend is extended to everyone. While the mass meeting this week is being held in Gordon Memorial church the public is reminded that the Oxford Group is non-denominational. It is for all sects and all races.

Quite a number from the local Oddfellows' Lodge will go with District Deputy, H. Leppard to the district meeting being held in Medicine Hat tonight.

TO ENCOURAGE BAY ROUTE NEXT YEAR

Assisted development of the Hudson Bay route will be continued next year by the Federal government and plans are in progress already for increased trade through Churchill during the 1934 shipping season.

JUST FOR FUN

They cut off a Chinaman's queue. They painted his head a bright blue. So the chinaman said, "As they daubed up his head, 'When I suee youse will ruee what you duese.'"

George: "I have a private secretary now."
Herman: "Did you fire the old stenographer?"
George: "No, but I raised her \$2 a week."

Two negro women met on the street.

"Land sakes, Opal," said one, "why such elegant finery on? You look like you ought be huntin' for a husband."

"I am, Lilly, I am."
"Why, I thought you was married to that Rastus Brown."
"I am; that's the one I'm huntin' for."

Magistrate: "Don't deny any longer that you committed this theft; you have heard three eye witnesses state that they saw you do it."

Accused: "What is the good of three eye witnesses? I could bring you millions of people who didn't see me to it."

A Red Bug married an Angle worm.

And a spade cut her in two. Now he is charged with b'aunder and the old Red Bug is blue.

"Royal Scot" in Rugged Setting

Putting her way along the tumbling Fraser canyon over rushing rapids and through cavernous tunnels, the "Royal Scot" is shown here as she approaches North Bend, B.C., at the start of her crossing of the Canadian Rockies over the scenic main line of the Canadian Pacific Railway.

Scottish flyer accomplished the Rockies crossing without benefit of "pusher" power and entirely under her own steam, this winning another achievement into the record of her Canadian and American tour. The rugged nature of the mountains along the C.P.R. line over the Canadian Rockies and the Fraser River rushing through its rocky caverns to the Pacific, shows the kind of country this famous British train conquered on her history-making trip over the Canadian Pacific.

Canadians continued to give the Royal Scot a warm-hearted welcome. Western Canadian cities turned out almost on mass to greet and escort the visiting train from the Mexican land.

Ambitious Plan To Construct Ocean Airports To Facilitate Air Travel Across Atlantic

Long the blue-printed dream of an imaginative inventor and his associates, construction of a chain of sea-airports across the Atlantic may now become a reality under the NIRA.

The Seadrome Ocean Dock Corporation, formed to translate into actually the plans of E. R. Armstrong, the seadrome inventor, has applied to the Federal Public Works Administration for a \$20,000,000 loan for the construction of five seadromes.

Claiming its revolutionary project is now a feasible and practical venture, the Seadrome Corporation asserts granting of the loan would put 10,000 men back to work in 30 days and would create a demand for 125,000 tons of steel.

The seadrome, or floating ocean airport, was first conceived by Armstrong in 1913, when he was invited to develop some safe method for trans-oceanic air travel. Under present plans the seadrome would be strung across the ocean in a series of about 450 miles to provide safe landing spaces for planes.

An open works of iron and steel, the seadrome is 1,225 feet in length and about 300 feet wide. The principal characteristics of the seadrome are its rectangular shape, with narrow ends, much like that of the landing dock of a naval airplane carrier.

Here buoyancy tanks would maintain the landing dock even keel during the time of its approach to the ocean where they are built of steel and concrete, attached to a 1,500-ton reinforced concrete anchor.

Because of its openwork girder construction, sponsors claim the seadrome can withstand the effects of huge ocean waves which they explain will pass through the streamlined structure without breaking.

Beneath the huge landing deck where airplanes would come to rest, would lie again in a row, the hangars, repair shops, weather bureau, radio equipment, beacon lights and modern hotels. Passengers will be able to stop overnight at the seadrome hotels in the middle of the ocean where they will be served restaurants, shops, beauty parlors, theatres and gymnasiums. The seadrome will also have stock exchange branches and even fishing facilities.

Use of the seadromes, according to its sponsors, will not only eliminate practically every vestige of danger and chance from trans-oceanic flying but will make the Atlantic crossing matter of only 30 hours at a time.

Each seadrome, a world in itself, weighs 65,000 tons and will cost an estimated \$5,000,000. It will be financed by a resident promoter of about 125 and a floating payroll of between 300 and 500 persons.

The first seadrome would be anchored in the ocean about 375 miles from New York city. Three others would be built at 200, 400 and 600 miles in a line due east to the Azores and the final link between the Azores and the coast of Spain.

Seadromes anchored in the Gulf stream, which is equivalent to the tropical latitude of Bermuda and the Azores, are expected to prove popular summer resorts.

In applying for the NIRA loan, the corporation set forth the fact that the seadrome project will be self-liquidating as a result of revenue expected from hotel and store concessions and fees from the several trans-Atlantic flights expected to patronize the ocean islands of steel.

It is further pointed out that no federal state, municipal or local board approval is necessary and no land taxes are involved, while the \$5,000,000 loan which would completely revolutionize ocean travel and place Europe only 30 hours away by air, is much less than the cost of even one naval airplane carrier.

The seadromes will be constructed in sections, probably ship-building yards at Philadelphia and Chester, Pa., towed to the Delaware breakwater for assembly, and from there to their final resting place in the Atlantic.

Discover Lost Tools

Discoverers of a "lost tribe" in the Himalayas Himalayas in 1931, Dr. J. H. Cooley, British, famous explorer and explorer, and Dr. J. H. Cooley, British. The tribe made up of about 400 people live at an altitude of between 25,000 and 30,000 feet, in caves on agricultural products obtained from valleys below, and still retain characteristics of an ancient civilization, they stated.

W. N. U. 1919

Great Increase Noted

Appendicitis Causes Many Deaths Annually States U.S. Doctor

Dr. Harold Meeker, clinical professor of ophthalmology, at McGill University, Montreal, told the Post-Graduate Medical Association of North America, at Cleveland, Ohio, that kidney disease sometimes affects the eyes, immediately in such a manner as to destroy the sight.

Appendicitis, said Dr. George P. Muller of the University of Pennsylvania, "has become so common that 20,000 young people die each year in the United States because of it. By young people, I mean an average age of 18." The reason for the increase in appendicitis cases, Dr. Muller added, is not known.

Seven years ago pernicious anemia was "absolutely fatal," but now says Dr. Cyrus C. Sturgis of the University of Michigan, it has a death rate of only 10 per cent.

Prior to 1926 pernicious anemia, commonly termed a deficiency in the quantity of blood or its constituents, was "absolutely fatal," with patients living an average of only two or three years.

The use of liver and liver extracts became a part of the treatment developed since that time to combat the high death rate.

Winnipeg Newspaper Union

By Ruth Rogers

Winnipeg, Man., Jan. 14.—The Winnipeg Newspaper Union, which has been in existence for some time, is now in the process of organizing its members.

The union is now in the process of organizing its members, and is expected to be completed by the end of the year.

Trying Novel Experiment

Modern Housing Plan To Be Commenced In Chicago

Under direction of a Chicago established by the late Marshall Field, department store owner, a novel experiment in modern housing is being conducted in Chicago.

It is a five-story apartment building, covering two blocks, and is being built on the site of a former department store. The plan is to build a modern housing project in Chicago.

Priced to attract tenants of average means, the building contains nearly 500 apartments. Stores, restaurants, barber shops, and a community hall are included in the building.

A court running almost the entire length of the two blocks provides room for a flower garden, shrubs and fully-equipped playgrounds for children from one to twelve years of age.

The most popular innovation, however, is a well-lighted department for child care and training. A classroom for primary instruction is provided. Also there is a nursery where mothers may leave their children all day.

In addition to the usual school subjects, music and art are provided for children. Inclined to these arts, industrial and vocational training is provided. Angelo Park, noted authority on child training, recently said of the new experiment: "I have dreamed of such a scheme for years. I tried to sponsor such a plan in New York, but my plan was rejected. I sincerely hope your pioneering effort will succeed."

Distinct Color Finest

First Cow Taken On Polar Expedition Made Milk Expensive

The first cow taken on a polar expedition, a cow named Byrd, is taking with him to the Antarctic are not the first of their species to be included in the equipment of a polar expedition. Captain Joseph Bernier, the veteran Canadian explorer, took a cow with him to Melville Island in 1908. Biologically, the results of that experiment may have justified the trouble involved, but from a financial standpoint it was a "disastrous" failure.

Quartered securely aboard the Government ship "Arctic," Bernier's cow died of starvation after the voyage and afterward at Winter Harbor was so enormous that the milk she gave probably was the most expensive ever produced.

Bernier's cow did not come back to pose as a scientific prodigy in civilization. Victim of her own devastating appetite and an irrepressible longing for the part of Bernier's men for fresh meat, she encountered a much more prosaic fate. A disillusioned Government issued instructions that thereafter its expeditions would have to be content with canned milk. — New York Sun.

Reducing The Noise

Sandy was learning to play the bagpipes. One night, while he was strutting about the room, skirling like his old man, he was interrupted by a loud noise. "That's an awfu' noise ye're making," said his mother.

Sandy sat down and took off his boots, then got up and resumed his playing in his stockinged feet.

Construction in Australia has been expanding for several months.

HITLER PLEADS FOR RETURN OF COLONIES

A report emanating from Berlin stated that Chancellor Hitler has made a plea for the peaceful return of the German colonies taken over by the Great War. Above is a rough outline map of Africa, showing the German colonies which were captured by the Allies during the Great War. Those shaded with vertical lines are now British possessions, while the small area shaded with horizontal lines has become French property. There are several small islands in the Pacific which were taken from Germany and which she would like returned.

Advice For Canadian

Daily Cow Exporters

For Giving Necessary Information That Will Be Financially Beneficial

In the export of Canadian dairy cows to the United Kingdom, shipowners and exporters will benefit financially, says W. A. Wilson, minister of agriculture, in a statement to the House of Commons.

He said that the shipping documents on which is listed the number of each cow and the approximate breeding date. Buyers want cows that will freshen shortly after arrival and will pay something additional for definite knowledge on that head. Furthermore, in the total absence of this information, bargaining on all sales, except in evident cases, proceeds on the assumption that the freshening date is speculative and will be delayed. The dairymen who are supplying the liquid milk trade, and who must have a nearly level supply, emphasize this point particularly. They may even decline to purchase cows whose breeding and conformation are suitable, just because the freshening time is doubtful. It is very difficult, therefore, to ship cows, even at some inconvenience, take the necessary precautions to remove that doubt, and thus give the importer the advantage of bargaining with certainty.

Cleaning Milk Machine

Weak Ice Solution For Rubber Parts Found Satisfactory

Additional work at the Dominion Division of Agricultural Bacteriology on the use of weak ice solution of 0.4 to 0.5 per cent, for the treatment of milking machine rubber parts, shows that milk of a satisfactory sanitary grade can be obtained when the treatment follows a clean water solution, eliminating the use of hot water. This represents the simplest and cheapest treatment for milking machines yet devised. Tests with milking machines and milk cans indicate that this has a very pronounced specific germicidal action on all kinds of bacteria which are responsible for so many defects in milk and dairy products.

Gave Clever Reply

Boy In African School Would Make Good Diplomat

They were studying St. Mark's account of Herod and the daughter of Herodias, in an African school. "And he swore unto her," the teacher read. "Whatsoever thou shalt ask of me, I will give it thee, unto the half of thy kingdom." "Now you see, said, to a sixteen-year-old African boy, "you may very likely be a chief some day. What would you have done if you had made that promise and she asked you for the head of St. John the Baptist?"

"I should have told her," the young African answered promptly, "that St. John's head did not lie in that half of my kingdom which I had promised her." — Protestant Episcopal Review.

Across the border hotel men are seeking another designation for bell boys who they no longer buy at the rate of \$100 a year. A reward is offered for a better designation of their calling.

"Your husband told my husband that his word at home was law."

"Oh yes? Well, it's one of those laws that's never enforced."

Describes Perfect Dinner

Boston Hotel Experts Told What Should Be Served

Here's the menu for a "perfect dinner" by Louis La Franche, Boston hotel man, formerly for many years in charge of banquets at Sherry's, in New York:

"First should be served real caviar," he said. "This should be followed with a glass of turtle soup, given an added flavor by the addition of some fine champagne. Then should come English sole with white wine sauce. Next, a whole roast partridge, served with sauce and bread crumbs. Very small and tender string beans should be served for the vegetable and a nice green salad with just a suggestion of garlic, then assorted cheeses and a bowl of assorted nuts and fruits."

Enforced The Law

Midway a cow went from one part of the farm to another. Thomas O'Brien to the constable. "The cow was arrested for smuggling. Through O'Brien's farm runs the boundary line between Northern Ireland and Free State. He took the cow from the Free State portion to the Northern Ireland part, intending to send it to the constable. The cow was seized and O'Brien was fined \$500."

For the first 37 weeks of 1933, ending 14th of September, 2,184,830 eggs were graded in Canada.

Greater Revenue Is Obtained By Provinces By Increased Cost Of Motor Vehicle Registration

Why Some Men Fail

Various Reasons Why So Many Do Not Make Success Of Life

Various reasons why some men become failures in life were given by Dr. Bernard Hollander, noted psychologist, speaking at a meeting in London, England, of the South Pacific Ethical Society.

They ranged from their laziness and over-weening ambition to the handicap of a bad marriage—the wife who is a millionaire round her husband's neck.

"A man fails," said Dr. Hollander, "if his ideas are larger than his purse; if he trusts unworthy people; if he puts pleasure before duty and his many duties; if he does not amuse himself; if he does not do today what he can possibly put off until tomorrow; and if he risks all his eggs in one basket when he is not in a condition to walk it."

"Some men are bound to fail because they are prone to dawdling, indecision, worrying, or forgetting. They are bound to fail if they have no sense of humor, lack cordiality, does not know how to approach men, or cannot make a rebuttal of a defeat into a success, confidence, and if he is too long-winded in his conversation, that people tire before he comes to the point."

Success or failure in life also depends to a great extent upon the temperament in marriage. Hollander continued.

"There is the clinging wife, the nagging at present, the domineering wife, the dull-witted wife who is something of a millstone around her husband's neck."

"There is bound to be failure when an aggressive, masculine woman marries an effeminate youth; when an independent and courageous man marries a helpless, stupid woman; and an athletic, vigorous woman marries a dried-up book worm."

Met Furniture In England

Cabinet Workers In London Alarmed At Its Increasing Popularity

Cabinet makers, whose industry is widely established in the outskirts of London, view with some alarm the rapidly increasing popularity of metal furniture, both in home and office equipment, and the fact that advances made by metal workers during recent months in producing elegant and by no means expensive household furniture is deplored at an exhibition now open at a well-known furnishing establishment in Tottenham Court Road, The exhibition is said to prove that modern metal furniture offers all, and possibly more, of the comfort and beauty of the best of the old-fashioned wood. Tubing of stainless steel, chromium, and a new lustre alloy of polished brass, is best in use. These curves are formed by cutting and the bases for dining and "occasional" tables. Cabinet-makers, however, will take comfort from one fact. The new metal furniture is so modern that it can be used only in the most modern homes, and the architects of the houses and flats in which it is to be placed.

Collection Of Historic Shoes

Interesting Exhibit In New York Insured For \$50,000

The boots Amelia Earhart sent to Paris in the first dancing slippers of Ruby Keeler, Marilyn Miller's blue satin pumps and those worn by Irene Castle at her premiere are among the 600 historically important shoes owned by Herman B. Dolman, New York, and placed on exhibition in the show salon of a Fifth Avenue store.

Only three pairs of the historic 500 belonged to the most famous of shoe designers, those of a Babo of Trent, and those of Lafayette. The boots of the slippers of the Empress Elizabeth of Austria, an Egyptian clog 500 years old, and shoes of women from the Azores in the South Seas are included. The collection is insured for \$50,000.

Trying To Check Growth

Because he is six feet, eight inches tall at the age of 14 years, Wilbur Latta, a student at the school, is taking hypodermic injections of a secretion taken from the frontal lobe of the pituitary gland, under the direction of a Denver medical expert.

Canada Buying Mangos

A considerable trade in graded mangos is developing between St. Lucia, British West Indies, and Canada. Graded mangos are now wrapped in paper on which instructions are printed as to how the fruit should be eaten.

MARKETING GRAIN
THROUGH POULTRY

Marketing grain through the poultry route would mean better than dollar wheat for the farmers who have poultry flocks even at present poultry prices, according to the provincial commissioner, in a recent bulletin on the finishing of poultry on the farm. A report of F. C. Eford, Dominion poultry husbandman, given at the world grain congress last summer, stated that experiments had shown that it takes 28 pounds of mixed grain, wheat, oats and barley, to grow a 3½ pound Barred Rock cockerel. In other words 4½ pounds of grain can be converted into one pound of chicken meat. On the basis of the present price of nine cents a pound for No. 1 chicken, 100 pounds of grain fed to good poultry for meat purposes would have a value of \$1.93, or at the rate of \$1.15 a bushel for wheat, 95 cents a bushel for barley and 96 cents a bushel for oats.

This sounds all right just now but supposing all the farmers went into this system of marketing their grain it would be only a matter of a year or so until Barred Rock cockerels would be as big a drag on the market as wheat is today, and those who regulate the price of farm produce would be offering two or three cents a pound for those cockerels. Then it would be in case of the Barred Rock cockerels being a few bushels of grain in and the farmer being a few bushels out.

A young man from the northern part of the province is now serving a term in jail for manslaughter. The charge was made as the result of the death of a young lady who met with an accident while driving with him in his car. The evidence showed that the car was overcrowded; that the driver had been drinking and that he was driving at an excessive rate of speed. All these are against the law and any one of them might have caused the accident, yet they are being done every day. The unfortunate part is that too often it is the innocent occupants of the car who have to pay the price with their lives for the foolishness on the part of drivers. Such drivers should remember that they are responsible for the safety of the occupants of their car. There are enough hassads on the highways now without taking any foolish, unnecessary chances.

A bulletin has just been issued by the Dominion Bureau of Statistics which gives the bureau's final estimate of the Alberta wheat crop for the season of 1933 to be 95,100,000 bushels as compared with 164,000,000 bushels for 1932. This makes it look as though there will not be much need for legislation governing the acreage for next season. Apparently Alberta farmers, assisted by drought and grasshoppers, are making an effort to relieve the government of this responsibility.

OPTICAL SERVICE

Our Optical Department is equipped with the most accurate and modern instruments known to optical science. The equipment represents an investment of \$4,000. The Optician in charge is an honor graduate of Canadian Ophthalmic College, Toronto, also of three post graduate courses. This technical training, combined with over 20 years experience, is at your service. Students' eyes tested without charge.

Here and There

One of the largest cargoes of lumber shipped from Great Britain on the Canadian Atlantic sea coast was forwarded to Great Britain recently. It consisted of 3,011,596 feet, mostly of deals.

Output of nickel in Canada in 1932 totalled 93,277,000 pounds valued at \$7,179,042. Production during the first six months of 1933 amounted to 23,851,451 pounds as compared with 21,562,716 pounds for the corresponding period of 1932.

Every house at some future date will have "air conditioning" and the word "heating" will pass out of use among house owners. J. J. Boardman, General Electric Company expert, told a largely attended meeting of the Electrical Club at the Royal York Hotel, Toronto, recently.

Sleep grades of the Rocky Mountain area presented no difficulty to the Royal Scot, each British flyer, en route to Winnipeg and the east from Vancouver recently. The all-British train, a attracting great popular enthusiasm throughout Canada, is its return journey to Montreal.

Montreal's "million dollar hole" on Dorchester street, where a railway terminal was to have been built, will become the world's most costly sunken garden, if Canada sees eye to eye with a couple of Montreal aldermen who advocate beautifying the gap with flowers and shrubs.

Canadian Pacific employees under 21 and minor sons of employees are again offered the opportunity of two University of Montreal scholarships by competitive examination, according to an announcement by Grant Hall, senior vice-president of the company. Applicants have until May 1, 1934, to make application.

Twenty-one months of training in a recognized shop, junior matriculation or its equivalent and a course in an academy to be established in Toronto is the ordeal for service for Ontario registration as barbers and hairdressers. It was stated at a meeting of territorial arbitrators at the Royal York Hotel, Toronto, recently.

Five ports hitherto not on the schedule of world cruise lines have been added to the 1934 itinerary of the Canadian Pacific liner Empress of Britain when she leaves New York, January 4 next. They are Samarang, Java; Bonteling and Padang Bay, island of Bali; Penang Straits Settlements; and Zambanga, in the Sulu Archipelago.

In making a choice between transportation by rail and by road, shippers should consider what the railroads are doing and have done for their advantage. G. G. Osmann, development commissioner, Canadian Pacific Railway, told the Rotary Club at Lethbridge, recently. He cited many cases where the railroads had first inventoried, then developed the natural resources of the continent.

It is now around to subscription time again. How is yours

Like a
SKYSCRAPER
built on
ROCK

A great building depends for its stability on the strength of its foundations. So in the world of commerce the goodwill of a business house depends on the soundness of the principles that guide it. Today, more than ever before, the building public places its confidence only in such situations as are built on the bedrock of integrity.

The EATON Mail Order service in Western Canada was built more than 25 years ago on foundations that have stood the test of time. The rock of Scientific Truth supports the giant edifice of buying and selling that lies behind the Catalogue. EATON'S Research Department is your assurance that each piece of merchandise conforms to EATON high standards, that each Catalogue description is strictly accurate. That is why EATON's has become the "skyscraper" of Canadian commercial enterprise.

A Great Piece Of Engineering

Builders of Bay Railroad Have Reason To Be Proud

'The crisis that threatens the existence of Churchill is grating to Canadians, not only because many of them feel that the development was forced on them by political pressure—it has been demanded by Western farmers for 50 years—but also because so much determined building under difficult conditions have been put into it. It is probable that the Hudson Bay Railroad, a branch of the Canadian National, which runs from Le Pas to Churchill, is one of the best and most spectacular bits of railroad building in the world.

Most of it lies over muskeg, that treacherous surface peculiar to the Far North, part decayed vegetation, part moss and ferns, which tends upon a frozen soil only a few feet or inches down, depending upon latitude. A railroad built over this constantly sinks, and each year has to be ballasted anew until it reaches the frozen ground. Through clouds of insects so thick men work in them almost as clumsy, and through snow storms which bury work trains out of sight, engineers have labored in all seasons on this road for years. And now in summer its roadbed is not inferior to that of the transcontinental line.

It ends at its northern terminus in a flat gravelly expanse between the Churchill river and the rocks which line the bay shore. Walking over it in summer gets beat into the eyes, and in winter a gale at 40 below zero compels everything not nailed down. But there is long line of track, the gray concrete towers of the elevator and freight chutes, the several roadhouse and the docks where several ships can be loaded with a full cargo of wheat in a day.

It is a task of which the engineers who built it may be proud, whether communally its building was wise or not. There is a tale told by a contractor to the "Sons of Mar-It" who did the work, and they tell it to the "Sons of Mar-It" in New York Times.

Can't Solve Mystery

Four Miles Find Way Across Seas From To Biologists

One of the mysteries of biology today is how oceanic birds find their way across the seas, according to V. C. Wynne-Edwards, assistant professor of ornithology at McGill University, who recently completed eight trips across the Atlantic during the summer months in a special study of sea-birds and their habits.

McGill ornithologist said the Atlantic, a bird allied to the gull, and smaller and with more powerful flight, breeds in the Canadian Arctic and spends the winter as far away as Patagonia and Antarctica shores, using the ocean as a highway in its migrations between the breeding grounds and the winter quarters in the far south. Although there have been theories that these birds swim and never alight on the water during migration.

Mr. Edwards pointed out that because they are so difficult to get at, comparatively little is known of their habits, and unless one is prepared to make a long journey on a specially chartered ship to the most remote southern islands, one would never see them at all.

Making Character

Like a small that crawls about your garden patches, and makes its shell a slow process of secretion from its feet. It is our only most powerful tool for making that mysterious something we call character, moment by moment. It is our only most powerful tool for making that mysterious something we call character, moment by moment. It is our only most powerful tool for making that mysterious something we call character, moment by moment.

While phosphorus, which once was used in making matches and caused many cases of the industrial disease called "phosphorus fever," is now prohibited in the match industry by every civilized country.

"I'm sorry, Mr. The master is not at home."

"Then he must be very absent-minded. I saw his head at the window just now. He must have gone without telling us."

Par's spent nearly \$24,000,000 last year.

Rubber has more than 1,000 uses, according to a European scientist.

France has less than 200,000 unemployed.

GOVERNOR-GENERAL AND LADY HESBOROUGH TOUR ONTARIO

The Excellencies the Earl and Countess of Hesbrough have started on a lengthy tour of Ontario cities and towns which will take them several weeks to complete. Our pictures show the Governor-General and Lady Hesbrough standing on the steps of Rideau Hall, Ottawa, and (at right) two close-up views of their Excellencies.

Work Of Half Century

World's Greatest Dictionary Has Been At Last Completed

At last, after half a century of work, the greatest dictionary in the world is finished. A modest little announcement has been made by the Oxford University Press to the effect that the Supplement to the New English Dictionary is ready, and is now offered free of charge. In paper covers to those holders of the complete Dictionary (A-Z) who apply for it before December 31, 1933.

The most extraordinary thing about this long process of publication, which began in 1858, is that for some time the great dictionary had actually been out of print—before it was finished. This is to be remedied, at once. Since have changed hands this year, at a price as high as \$100, but the whole dictionary is now being revised, complete with the supplement for £21. It will be in twelve volumes and a supplement volume, bound together in 400 quarto pages. Nearly two million quotations are printed in it as evidence of various forms and usage.

The supplement contains a large number of technical words. You need only refer to it in 1858, when the first volume was published, there was no flying, no radio, wireless, or cinematograph, to realize the need of the supplement. It is fully dealt with also—Overseas Daily Mail.

An Earthly Paradise

Natives of Solomon Islands Have Reason To Worry Them

Situated in the South Seas there is an earthly paradise—Solomon Islands. According to the colonial report on the British protectorate, the 20,000 natives of the Solomon Islands have not a worry in the world.

"They have no taxes, no public debt, and no factories. They have no concern with the cost of living. Every employer of native labor is free to pay the lowest wages possible to provide adequate ration, soap, salt, bedding, tobacco and clothing for the laborer, his wife and children.

Minimum rates of wages—\$50 a year for the male adult—are also fixed. There is no land-hunger. Every native has ample ground for the support of his family.

He grows yams, sweet potatoes and other vegetables for his own needs.

Binghuah—"I see the Bolivians have got out a Who's Who, for Buenos Aires."

Wanglooh—"Yeah! And so—"

Binghuah—"So they called it 'Who's Who'."

Aberdeen—renowned for its thrift—is the only town which has subscribed towards the printing of a Scottish National Dictionary. Nearly 300 organizations were asked.

Pope Pius Thursday received in audience 100 Canadian Holy Year Pilgrims from all parts of the Dominion.

Preventing Sea-Sickness

Medical Superintendent Of Steamship Line Gives His Advice

Nobody ever set foot aboard ship without soon discovering that, at least half the passenger list held strong views on the proper way to prevent or cure sea-sickness. Good sailors will declare it's all mental; just don't think about it. The others have elaborate systems of diet and resting before sailing.

An article in the Practitioner by the medical superintendent of a steamship company holds to the established theory that the chief difficulty is in the balancing apparatus, the semi-circular canals in the ear. Movement of the fluid in them disturbs the nervous system, with the well-known result. There is, he insists, no direct means of control.

Yet he advises accounting the body to unbalancing disturbances. Exercises of rotation are the thing. A revolving chair is useful for a progressive series of revolutions, the head tipped at as many different angles as possible. A good substitute is the "children's exercise of walking round a case." Most important, every possible opportunity of swinging or riding in life should be used.

A course on Casey Island "swamp" and switch-backs would fitly top off the training.—New York Times.

German officials say that unemployment caused improve further until efforts are increased.

Cigarettes smoked in England last year totalled nearly 44,000,000,000.

People easily misled seldom consider another's feelings.

Poland now has over a million people, including 174,000 Jews.

An Interesting Exhibit

Radio Transmitter Can Be Worked By Personal Electric Energy

Radio Transmitters and signal trains worked by personal electric energy are the results of an invention on view at the "Model Engineers' exhibition in London, England.

The inventor is Major Raymond Phillips, who has made many other discoveries in radiography. He calls his invention a radio-tele-controller, which is somewhat after the style of the "teletype" experimented with recently in America. He has been working on it for almost a year.

Each person registers the amount of current a person generates. This varies according to personalities, but conversion is an aid to the production of electric force.

While explaining his invention Major Phillips placed on a table two sets of rails, on which there were two trains, each four feet long. A movable battery was laid on the table, and when Major Phillips held the handles he caused the train to run by the electric energy generated from his own body. There were no wires whatever attached to the table.

The invention also enables human beings to operate wireless transmitters with current from their own bodies.

Major Phillips explained that if a person has his temperature goes up. The liar is apt to think he may be discovered, and gets all hot and bothered. His emotion is faithfully recorded on the dial.

The law court suggests itself as a market for the invention, which many judges might welcome.

Has Precarious Job

But Repair Experts Not Afraid To Navigate City Sewers

The sewers of Paris or the catacombs of Rome would hardly be so terrible for Albert Evans, of St. John's, N.B. If he were the old French royalist look over under the streets of Paris during the revolution, he could have found information on the art of navigating narrow and turbulent sewers. Evans' system, based on a sewer repairer's job for the past few years, Evans estimates he has saved the city of St. John's over \$10,000.

When signs of leakage are detected Evans goes down into the faulty sewer pipe, letting a long rope drop him. He has a handkerchief he has broken is discovered the length he has travelled underground is marked on the rope. Then it is simple to locate the spot where excavation should be made.

Unfortunately for Evans he is not the only frequenter of these passages. Rats and mice make their homes there, while gas, acids and oils add to the difficulties.

But Evans treats his dangerous and unpleasant occupation philosophically. "It's my job," he says.

Memorial For Zeppelin

Tre In England Where German Machines Fell To Be Preserved

The oak tree on the Oakmere estate, Putney Park, Hertsfordshire, England, into which the German Zeppelin L-31 fell in flames when shot down in October, 1918, is to be preserved as a permanent memorial.

Since the war the tree, which has grown although cut in half by the falling Zeppelin, has been a place of pilgrimage by Germans visiting the graves of the Zeppelin crew in Putney Park cemetery.

When building developments started in the field in which the tree stands it was feared that the tree would be cut down, but, consequent upon public opinion, the developers have offered to present it, together with a piece of the tree, to the Zeppelin crew. His wife enjoyed it over her morning coffee that food should be laid and seats provided.

The South Mills rural council has decided to communicate with the estate developers with a view to taking advantage of this offer.

Honey Production In Saskatchewan Doubled

Although Crop In Parts Of Province Was Total Failure

Beeskeepers of western Saskatchewan suffered a partial to total failure of honey crop this year, according to government information, but in spite of this the province's honey product was twice that of 1932.

On the west side of a line touching Edmonton, Regina to Saskatoon, according to reports from 250 beekeepers, honey yield was a failure this year. East of the line a bumper crop was secured, and the total yield in the province was \$27,000,000.

Released in Wellington, England, a Zeppelin has been found in Rango, Germany.

Reclaiming Land In Italy

Men Has Played Large Part In Creating New Land For Cultivation

A few who visit Italy realize what a large part man has played in creating the very soil of the peninsula, and the great industry of land reclamation works in this mountainous land, hewed up by volcanic convulsions, and supported by man with the broad acres required for the sustenance of a teeming population. The rich valley of the Po is the work of its earliest inhabitants, who, by digging a bed for the waters running down from the Alpine glaciers, reclaimed a prehistoric golf. The mysterious Etruscans who colonized so large a section of the peninsula were responsible for drainage Central Italy. The Volsci, before their defeat by the Romans, had reclaimed the lands which afterward reverted to swamps known as the Pontine Marshes, but which, in their day, provided food for the inhabitants of the surrounding towns. In Magna Grecia, Hellenic cities reclaimed and brought under cultivation the swamps of the Ionian coast. The Romans continued the work of the peoples who had preceded them, draining and reclaiming swamps along the Val di Chiana in Tuscany, Lake Fucino and the surrounding territory in the Abruzzi, the valley of the Diavolo in Campania—Nineteenth Century and After.

Saskatchewan Winning Fight Against Trachoma

But Figures Show Disease Spreading Among Indians In Canada

Trachoma Is Decreasing In Saskatchewan

In 1931 when the government began a vigorous campaign against the scourge, there were more than 2,000 cases among the white population. Now there are fewer than 500 cases.

Among Indians, treatment of whom is the responsibility of the federal government, the disease is spreading in Canada according to Ottawa figures. Between 7,000 and 8,000 cases are reported, an increase of 10 per cent reported on year ago.

Hon. F. D. Munroe, Minister of Public Health, says that the provincial health department has been active in 1931 with the appointment of full time doctor who actually started work in 1932. In addition there were three full time nurses and one nurse, working in four districts where cases were reported.

Trachoma cases now are confined to regions in the Southern area; Swift Current and Kayville, three points recognized as treatment centres for a large area adjacent to these places. A few isolated cases in other areas of the province are all under treatment.

Announcements to the last regulations governing communicable diseases have been made, under powers compelling suspected cases to undergo examination and treatment, said Dr. Munroe.

Hard To Patch Up

Policy Of One New York Hotel Nearly Caused Trouble

The Hotel Wellington is one of those which send follow-up letters to guests who haven't been back for some time. Like this: "We just wanted you to know that we've missed you and hope the only reason you haven't been here is because you haven't come to New York since you were with us last." Well, it, they sent one two weeks ago to the California home of a gentleman who has been staying at the hotel since January.

His wife enjoyed it over her morning coffee that food should be laid and seats provided.

The South Mills rural council has decided to communicate with the estate developers with a view to taking advantage of this offer.

Beeskeepers of western Saskatchewan suffered a partial to total failure of honey crop this year, according to government information, but in spite of this the province's honey product was twice that of 1932.

On the west side of a line touching Edmonton, Regina to Saskatoon, according to reports from 250 beekeepers, honey yield was a failure this year. East of the line a bumper crop was secured, and the total yield in the province was \$27,000,000.

ALBERTA'S OPPORTUNITY

in the

British Bacon Market

For the first time in history the World's Greatest Bacon Market has granted a definite quota to Canadian Bacon Producers, under Controlled Imports to Assure a Steady Market. Canada's quota is 280,000,000 lbs. annually.

The Key to This Market is Quality

Alberta was second in 1932 among all provinces in total hog marketing, but only eight hogs in every 100 marketed were suitable for the British trade.

Not More Hogs, but Better Hogs

What is needed is not greater numbers, but a greater proportion of the Select Bacon Type required by the British Market.

Policies to encourage production of High Quality Bacon Hogs Suitable for Overseas, have been adopted by the Alberta Department of Agriculture in co-operation with Federal Government, Railways and Packers. These including hog bonusing and exchange of off-type sows by the farmers for selected gilts from the packing plants.
